

## PRACTICAL TOOLS for a disability inclusive COVID-19 response

*Source: The Leprosy Mission*

### Note:

Comprehensive guidelines, recommendations and overviews of resources on how to ensure that people with disabilities are included in COVID-19 responses can be found via WHO, IDA and IDDC / Core Group (see links page 3). In this document we **aim to highlight the practical tools**, such as sign language videos, easy-read materials, accessible protection methods, etc.

This document will be continuously updated in the coming weeks and months (see also [www.dcdd.nl/resources](http://www.dcdd.nl/resources)). DCDD gathers tools that have been developed by our network participants and other disability organisations. DCDD is not responsible for the content of these tools.

Do you have tools you would like us to include?

Please send an email to [g.schmidt@dcdd.nl](mailto:g.schmidt@dcdd.nl)
