# The Process

## National / Regional Level

Sensitisation for an enabling Environment

## Local Level

1. Awareness Raising
2. Action Plans
3. Construction

# Awareness Raising

## Promoting DRR and CC sensitivity at all levels

- Delegation/Country Office
- Host National Society / Country level partners
- Implementing partners and team at local level
  - District branch
  - Health facilities
  - Schools
  - CBOs/Mother groups

# Sensitisation and action plan

1. Why do we need to be better prepared for and protected against disaster risk?
2. Identifying common hazards that the community faced/may face
3. Identifying the most vulnerable areas in the communities - and the seasons
4. What coping mechanisms should be continued and what measures added at the local level for preparedness?
5. Plan of work and allocating responsibilities and resources

# Mainstreaming measures

## Health Facility Operation and Management Committee

- Emergency health plan
- BBS / Retrofitting

# Mainstreaming measures

## Water User Committee

- Priority for rehabilitation of existing water scheme
- DRR sensitive infrastructure / BBS
- Mapping for water source and locating hazard prone areas
- Water Safety Plans

# Mainstreaming measures

## Schools

- Sensitisation on disaster risk
- Simulation exercises
- Evacuation plan
- First aid training

# Mainstreaming measures

## Community groups – Mother groups

- Preparedness
- Early Warning Systems
- SMRF (Safe Motherhood Revolving Fund)
- Evacuation Plan

## HH level key messages

- Water buckets full of water
- No unattended fire
- Lighter out of reach of children

# Mainstreaming measures

## Health and CCA

- Promotion of improved cooking stoves

## WASH and CCA

- Plantation for protection of water source
- Rain water harvesting system
- Multi-use of water
- Private tap with meter system / Eco-use
- Waste segregation and management
