

Mainstreaming DRR & E/CC in Education a necessity and an opportunity

Examples from the policy and operational levels

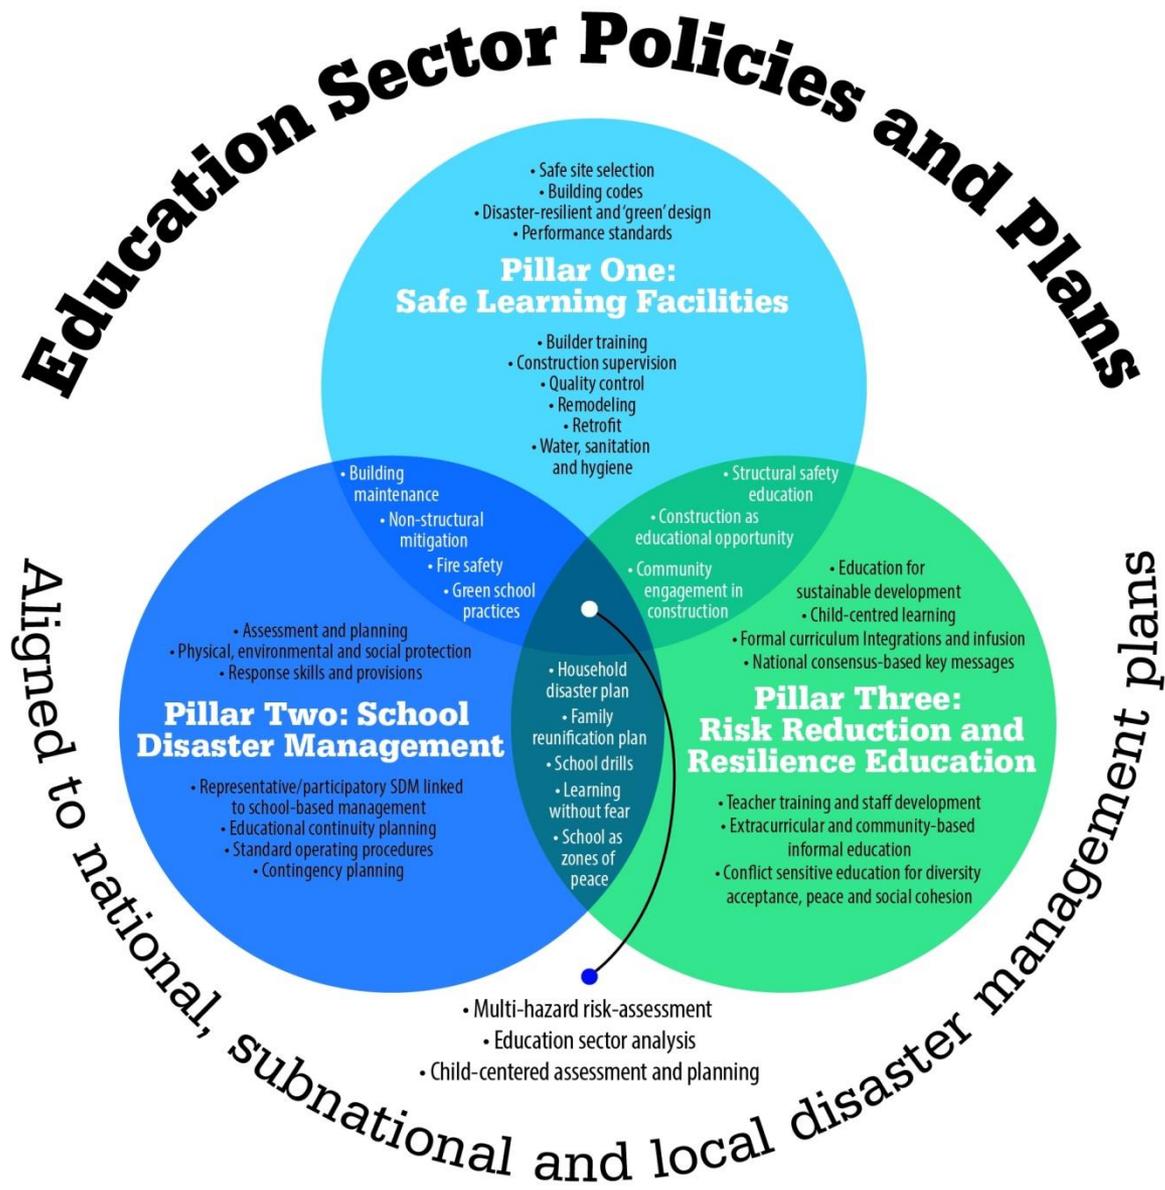

E/CC & DRR Network Event, 12.09.2017
Sabina Handschin, SDC Focal Point Education

Disasters impact the right to education

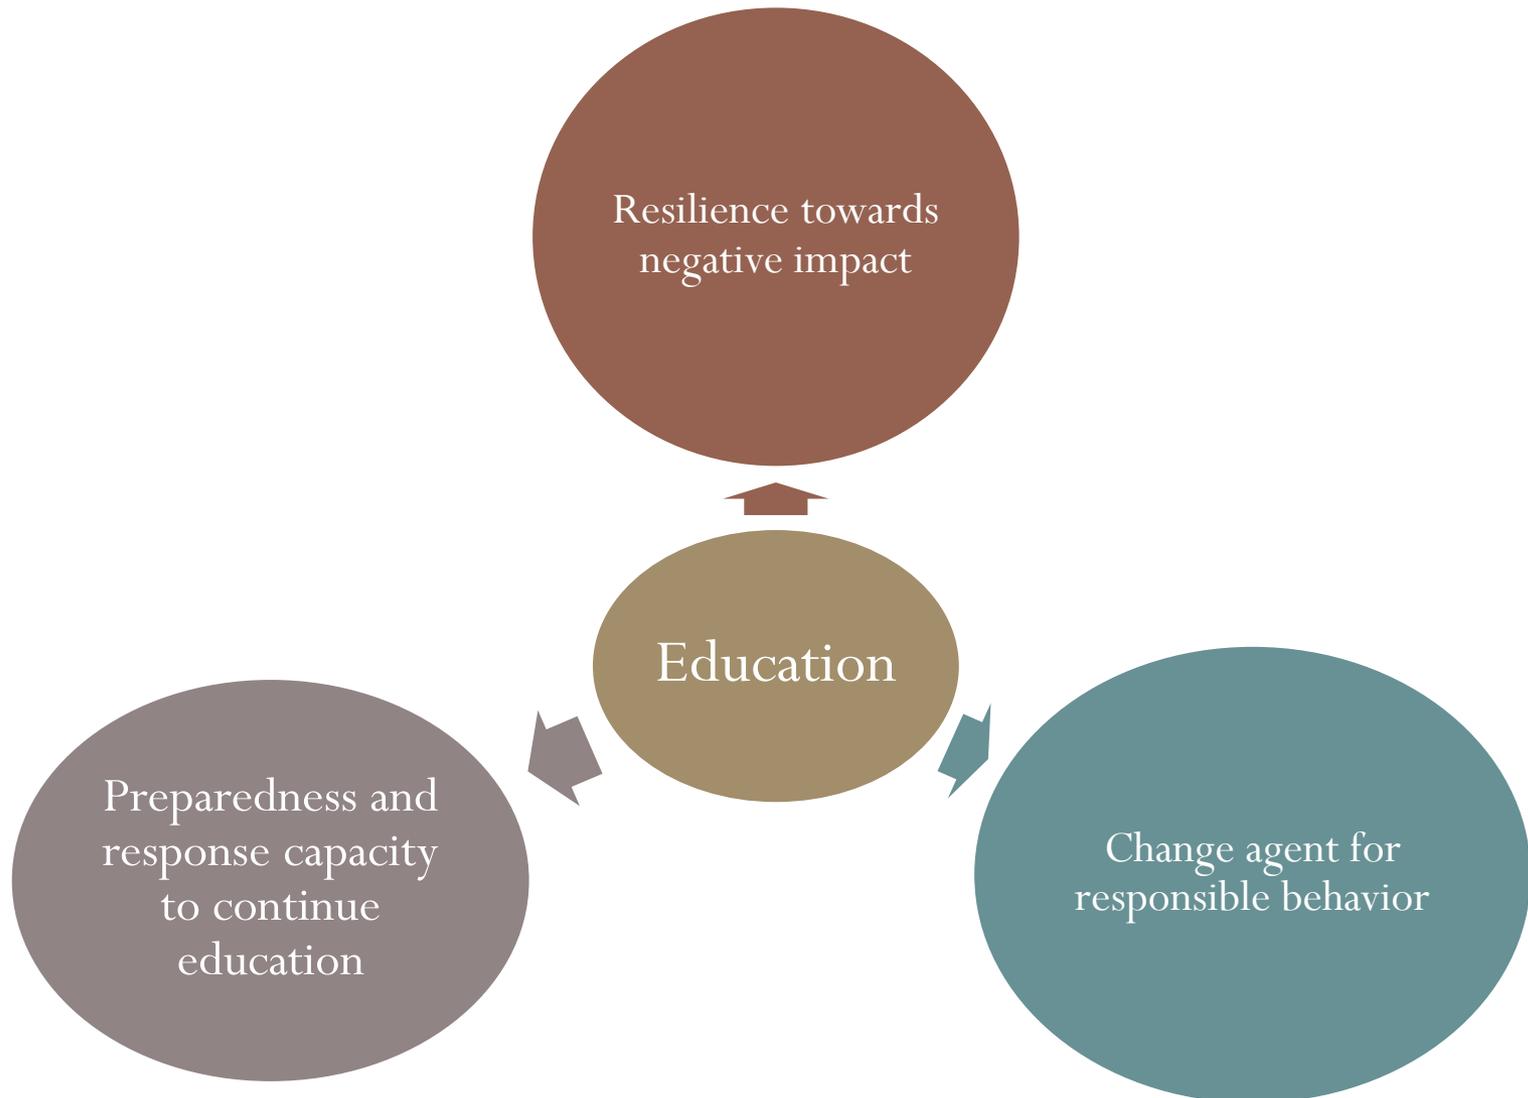

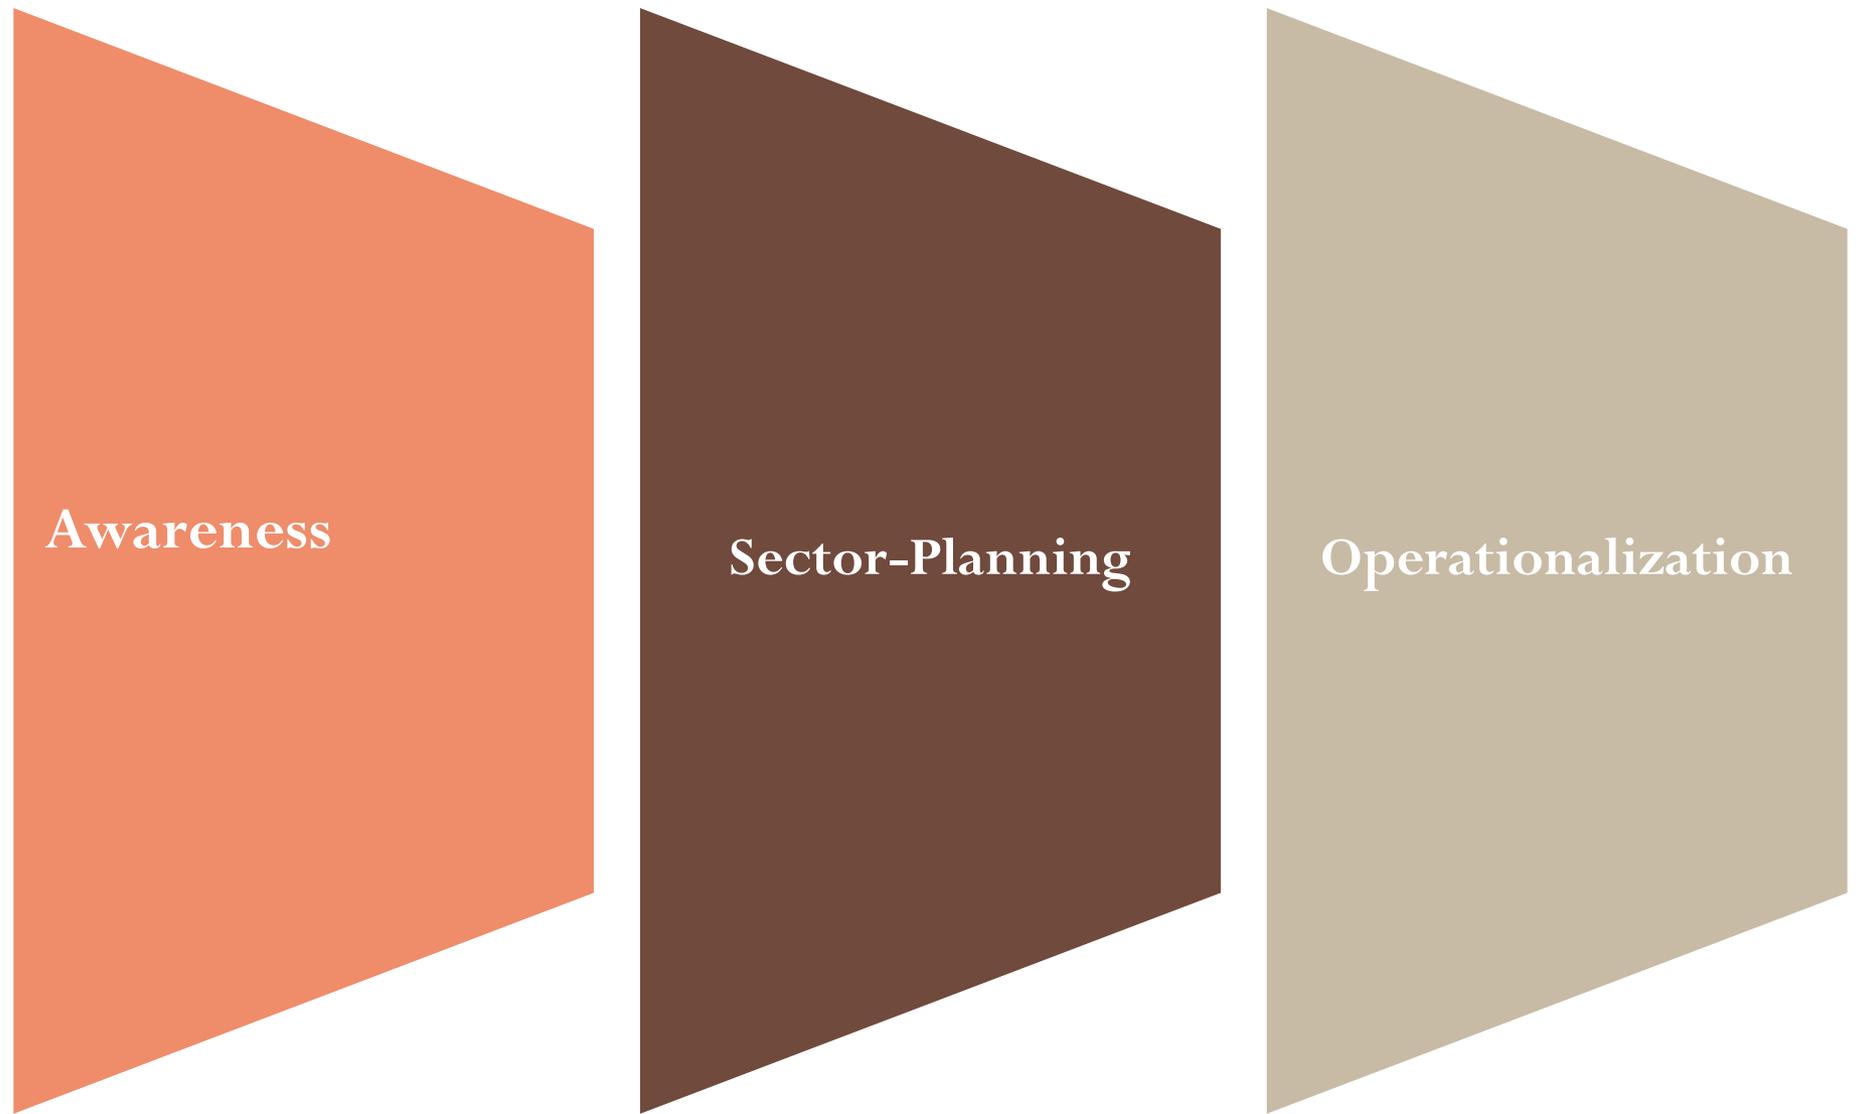

Facing the reality – taking comprehensive action

The role of education systems and schools with regards to CC and disaster

Key factors for successful mainstreaming

Awareness

Sector-Planning

Operationalization

Burkina Faso

Awareness

- Impact of disaster on education
- Role of education actors before and during disaster
- Role of education to mitigate/prevent disaster

Sector-Planning

- Committee for DRR-leadership (inter-ministerial, cross-sectorial)
- Hazard, vulnerability analysis in the education sector
- Risk reduction strategy for education sector (costed)
- Integrated in Education Sector Plan

Myanmar

Operationalization

- Safe school construction standards and implementation
- Capacity building educ-authorities, communities, teachers on DRR and CC
- Community- and school-based disaster-management

Key-Lessons for successful mainstreaming

- Awareness, accountability and investment case, continued advocacy
- Political will and leadership, institutional capacity
- Participatory multi-level approaches and child-centred
- Vision of change, long-term involvement, investment and support

SDC's Education Strategy has E/CC & DRR mainstreaming incorporated as a cross-sectorial approach

The SDC's Education Strategy Basic Education and Vocational Skills Development

- Providing safe, healthy, protective learning quality environments (3.3.4)
- Improving young people's knowledge on adverse effects of climate change and disaster and enhance resilience (3.5.2)
- Promoting education for sustainable development across sectors (3.5.4)
