# **SDC Guidelines on the Use of Aggregated Reference Indicators for reporting and monitoring the Dispatch 2017-2020**

## **1. Background**

- 1.1 As per current practice, monitoring the Dispatch 2017-2020 will continue to be based on the Annual Reports of country programmes, global programmes, Swiss NGO contributions and CCMs. The present Guidelines set the requirements for enhanced Reporting on the Dispatch including for external communication purposes.
- 1.2 The political reporting of the results achieved in the 2013-16 Dispatch confirmed the relevance of using selected indicators in order to communicate aggregated achievements on an institutional level. Until now, the results have been documented in the Annual Reports based on a very large diversity of indicators. The advantage is that the indicators chosen were based on the given contexts and demonstrate well the specific achievements, while allowing a maximum of flexibility in implementing a strategy. A disadvantage is that these indicators did not facilitate communicating of the results of SDC across different situations.
- 1.3 The preparation and political discussion of the 2017 – 2020 Dispatch has shown the growing importance of reporting comprehensively and convincingly on aggregated corporate results achieved through Swiss support, to sustain parliament and broad public support for international cooperation in view of securing the finances needed to carry out our work.
- 1.4 Based on these premises, SDC Directorate decided in May 2016 to complement the indicators used so far in the Results Frameworks of Cooperation Strategies and Global Programmes, with mandatory Aggregated Reference Indicators (ARIs). ARIs will allow communicating on selected achievements, across a wide range of situations, countries, themes and institutions in which SDC intervenes. ARIs therefore serve for communication and reporting needs, while overall attention should be maintained on the effectiveness of SDC efforts and on the outcomes which guide our work.
- 1.5 Target group: These guidelines address all SDC staff members contributing to monitor the Dispatch 2017-2020, which includes staff preparing, assessing or approving cooperation strategies, strategic and CCM frameworks and their respective annual reports, and staff reporting on the Dispatch.

## **2. Definition and use of ARIs**

- 2.1 ARIs allow to assess outcomes and outputs achieved with SDC support, which contribute to the 10 Effectiveness goals in conjunction to the Swiss thematic priorities defined in the Dispatch 2017 – 2020. They should be collected with little additional effort and be relatively easily quantifiable. They represent a selected and limited part of SDC's results and supplement other existing indicators. ARIs provide a link between the Dispatch 2017-2020 and the results to be achieved by partner countries and SDC programmes. The latter results are a mix of both quantitative and qualitative outcomes. They are situation-specific and capture the effects of our interventions, resulting in changes of peoples' lives and partner institutions. These guide our work and are monitored to steer our programmes.

- 2.2 ARIs are based on years of experience of SDC thematic networks. The Focal Points/networks reviewed the indicators reported so far and, with the Quality Assurance (QA) Network, selected a few which meet the criteria above and are linked to the SDGs. The choice was further consolidated with QA and E+C and the Deputy Heads of SDC Domains. It is likely that most ARIs will remain relevant beyond the validity of the Dispatch 2017 – 2020.
- 2.3 The ARIs do not replace but complement the thematic reference and context-specific indicators which are outcome-oriented and provide a deeper and broader set of results.

Figure 1: The use of indicators in Result Frameworks

Indicators	Utilisation
Aggregated Reference Indicators (ARI)	Mandatory if a strategy covers the respective thematic area and if relevant
Thematic reference indicators for Conflict and Human Rights	Mandatory if a Cooperation Strategy covers a state categorised as fragile <sup>1</sup>
Thematic reference indicators (outcome oriented)	Voluntary but recommended if a strategy covers the respective thematic area
Specific country and thematic indicators (outcome oriented)	According to the context, adapted to the local requirements

- 2.4 The list of ARIs in the annex of these Guidelines is binding. This list is to be examined carefully, taking into consideration each theme which is either included or touches upon the Results Framework of a given Country Strategy (CS) or medium-term strategy of a global programme. It is important to examine the whole list as several ARIs address transversal themes or concern more than one theme. For each theme, the ARIs should be selected if they are relevant and make sense in the concerned situation. ARIs are to be included in all Result Frameworks coming into effect between January 2016 and December 2019. If the Concept Note of the CS was already approved by SDC Directorate in the course of 2016 (or even 2015), ARIs have to be included, either by replacing a foreseen similar indicator, or by complementing the list.
- 2.5 The list of ARIs is complemented with so called Indicator Sheets. These have been prepared by the thematic responsible staff to provide more details to assist in choosing the ARI, and in collecting and reporting results (e.g. measurement unit, methods of data collection, disaggregation).
- 2.6 To monitor the Dispatch, the period covered is 1st July 2016 to July 2019. The first annual report containing ARI results will be presented in fall 2017, the last in fall 2019. For each ARI result presented, the duration of the reporting period should be specified (e. g. from January 2017 to June 2017).
- 2.7 In cases of programmes or projects covering more than one country (e.g. regional or global projects/programmes and programmes supported by SDC Institutional Partnerships), the countries concerned by the ARI reported need to be also specified. This enables reporting on the number of countries benefitting from Swiss support on the topic covered by the ARI.

<sup>1</sup> [Link](#)

- 2.8 Results pertaining to people benefitting from interventions should be disaggregated according to gender. The list of ARIs and the Indicator Sheets specify whenever further disaggregation is required (e.g. by age groups).
- 2.9 Care must be taken not to double count: e.g. people who gained access to services covers those who newly started using these during the period specified and do not include the population who was already using these before.
- 2.10 All ARIs relate to results achieved through SDC or Swiss support, thanks to projects or programmes financed by Switzerland.
- 2.11 Important: ARIs serve the objective of communication and complement the outcome monitoring that is well established through the monitoring and reporting of Result Frameworks. Outcome monitoring remains top priority at SDC.

### **3. Responsibilities**

- 3.1 Project data should be collected directly by the implementing partner. It is suggested to be pragmatic about data collection and use a transparent method.
- 3.2 The SCO/embassy in charge and the global programmes integrate ARIs in their strategies and report yearly on the results achieved, including the ARIs.
- 3.3 The geographic divisions prepare annually a synthesis of results presented in the Annual Reports of the countries they cover (based on ARIs and outcome indicators). This will provide a consolidated picture of results achieved in the region. The Heads of Division in charge of a theme (Themenverantwortliche) and their staff (focal points/ thematic programme officers ) subsequently compile the results reflected in the syntheses of the Divisions and complement these with results from thematic programmes and projects under their direct responsibility (e.g. Global Programmes), so that all results achieved on a given theme can be presented. The respective QA officer in each Staff Unit (QS Stab) further compiles the information results of the concerned Domain.
- 3.4 The E+C section is in charge of compiling the information related to the annual reporting of the Dispatch and, in 2019, to monitor the progress, to report and communicate about the achievements made.
- 3.5 The thematic FP and networks are in charge of thematic quality and provide support with regard to the ARI Indicator Sheets. The FP and the respective Division Head set up and update their list of Thematic reference indicators (outcome oriented). SDC programmes are encouraged to make use of these, as they provide help and inspiration for both qualitative and quantitative indicators deemed very relevant thematically (instead of reinventing the wheel). If they are widely applied, they will also contribute to establishing a results base across a range of situations which will further strengthen our reporting.
- 3.6 Annex 2 provides the web links to the sharewebs of the thematic networks and the lists of Thematic reference indicators.
- 3.7 The QA section and QA network provide methodological guidance and support in monitoring the Dispatch and the use of ARIs. The Guidelines and the mandatory list of ARIs are under the responsibility of the QA section as approved by SDC Directorate.
