

## Gender ToT 2021 – Day 2

# Interactive Session on Gender Analysis

Photo: Meier (2018)

Prepared and presented by Dr Marianne Meier (University of Berne)

## Proposed Agenda

1. Gender Analysis in SDC
2. Video: GBA+ (City of Edmonton)
3. Challenges and Analytical Framework
4. Practical Application (Steps 1-3)
5. Recap and conclusion

## Gender Analysis in SDC

### What is it?

Gender analysis is a **systematic analytical tool** used to identify, understand, and explain the different **roles, needs, obstacles and opportunities** of men and women and the **relations** between them.

It serves to identify **inequalities, vulnerabilities, exclusion and discrimination** based on gender roles and attributes.

## Gender Analysis: Basic questions to ask?

- Who has power?
- Who owns/controls resources?
- Who takes the decisions?
  - Who sets the agenda?
- Who gains, and who loses?
- Which men, and which women?

## Gender Analysis in SDC

### Key questions to be asked:

1. What are gender **inequalities and obstacles** in your context?
2. What needs to change, what is the **objective**?
3. How can this objective be **addressed** in your intervention?
4. How can this objective be **monitored and reported**?

### WHEN?

Before the start of a project, program or cooperation strategy

### BY WHOM?

Gender-sensitive and competent internal staff and/or external experts

# Gender equality =

A key for poverty alleviation and sustainable development:

Gender equality is the equal enjoyment by women and men of socially valued goods, opportunities, resources and rewards.

**Important:** The aim is not that women and men become the same, but that their opportunities and life chances become and remain equal.

OECD-DAC definition (2003)

# Gender Analysis: Inequalities and obstacles

# Gender Analysis: Inequalities and obstacles

## Gender equality:

### Equal chances or opportunities

- access and control (social, economic and political).
- resources, including protection under the law (health services, education, voting rights, etc.).

## Gender equity:

**Reference to fairness** and consideration of men's and women's different needs to achieve gender equality.

*=> Both gender equality and gender equity are needed!*

**1** NO POVERTY

**2** ZERO HUNGER

**3** GOOD HEALTH AND WELL-BEING

**4** QUALITY EDUCATION

**5** GENDER EQUALITY

**6** CLEAN WATER AND SANITATION

**7** AFFORDABLE AND CLEAN ENERGY

**8** DECENT WORK AND ECONOMIC GROWTH

**9** INDUSTRY, INNOVATION AND INFRASTRUCTURE

**10** REDUCED INEQUALITIES

**11** SUSTAINABLE CITIES AND COMMUNITIES

# THE GLOBAL GOALS

For Sustainable Development

**12** RESPONSIBLE CONSUMPTION AND PRODUCTION

**13** CLIMATE ACTION

**14** LIFE BELOW WATER

**15** LIFE ON LAND

**16** PEACE AND JUSTICE STRONG INSTITUTIONS

**17** PARTNERSHIPS FOR THE GOALS

## SDG 5: Achieve gender equality and empower all women and girls

### Targets and indicators:

#### 5.5

Ensure women's full and effective participation and equal opportunities for leadership at all levels of **decision-making in political, economic, and public life.**

*Indicator 5.5.1: Proportion of seats held by women in national parliaments and local governments.*

*Indicator 5.5.2: Proportion of women in managerial positions.*

*=> Both gender equality and gender equity are needed!*

## SDG 5: Achieve gender equality and empower all women and girls

SDG 5 targets do not touch upon two topics regarding “gender”:

1. **LGBTIQ+ issues are missing**, despite the existence of structural discrimination and violence against persons who identify with these categories.
2. **Little mention of men and boys** in these targets. The word “gender” seems to be synonymous with women, even though engaging men and boys is critical to achieve several targets of SDG 5.

## Proposed Agenda

1. Gender Analysis in SDC
2. Video: GBA+ (City of Edmonton)
3. Challenges and Analytical Framework
4. Practical Application (Steps 1-3)
5. Recap and conclusion

Video: City of Edmonton / Canada (4:11 min.)

<https://www.youtube.com/watch?v=p6w-d1mmjFU>

Gender-Based Analysis + : What is it and Why?

## Questions A:

General impressions

1. Are there any surprises or “aha moments” for you in this video?
2. What is the main personal take-away for you from this video?

## Questions B:

### Work reality

1. Are aspects of this video “**transferable**” to your work reality?  
If yes or no, in what sense?
2. In your work reality, can you think of situations/projects in which the **lack** of different perspectives/lenses caused problems and challenges?
3. In your work reality, are there **procedures** in place to assure the consideration of different perspectives/lenses? If yes, what kind?

## Proposed Agenda

1. Gender Analysis in SDC
2. Video: GBA+ (City of Edmonton)
3. **Challenges and Analytical Framework**
4. Practical Application (Steps 1-3)
5. Recap and conclusion

## Potential challenges doing gender analysis:

- A gender analysis often addresses **sensitive topics** (religion / resistance to change / fear of losing control, influence, power).
- Doing a gender analysis can be **time and budget** consuming.
- To get valid **primary data**, specific scientific knowledge is needed.
- **Secondary data** on gender is not always reliable and needs verification.
- **Methodological challenges** regarding data collection and analysis...

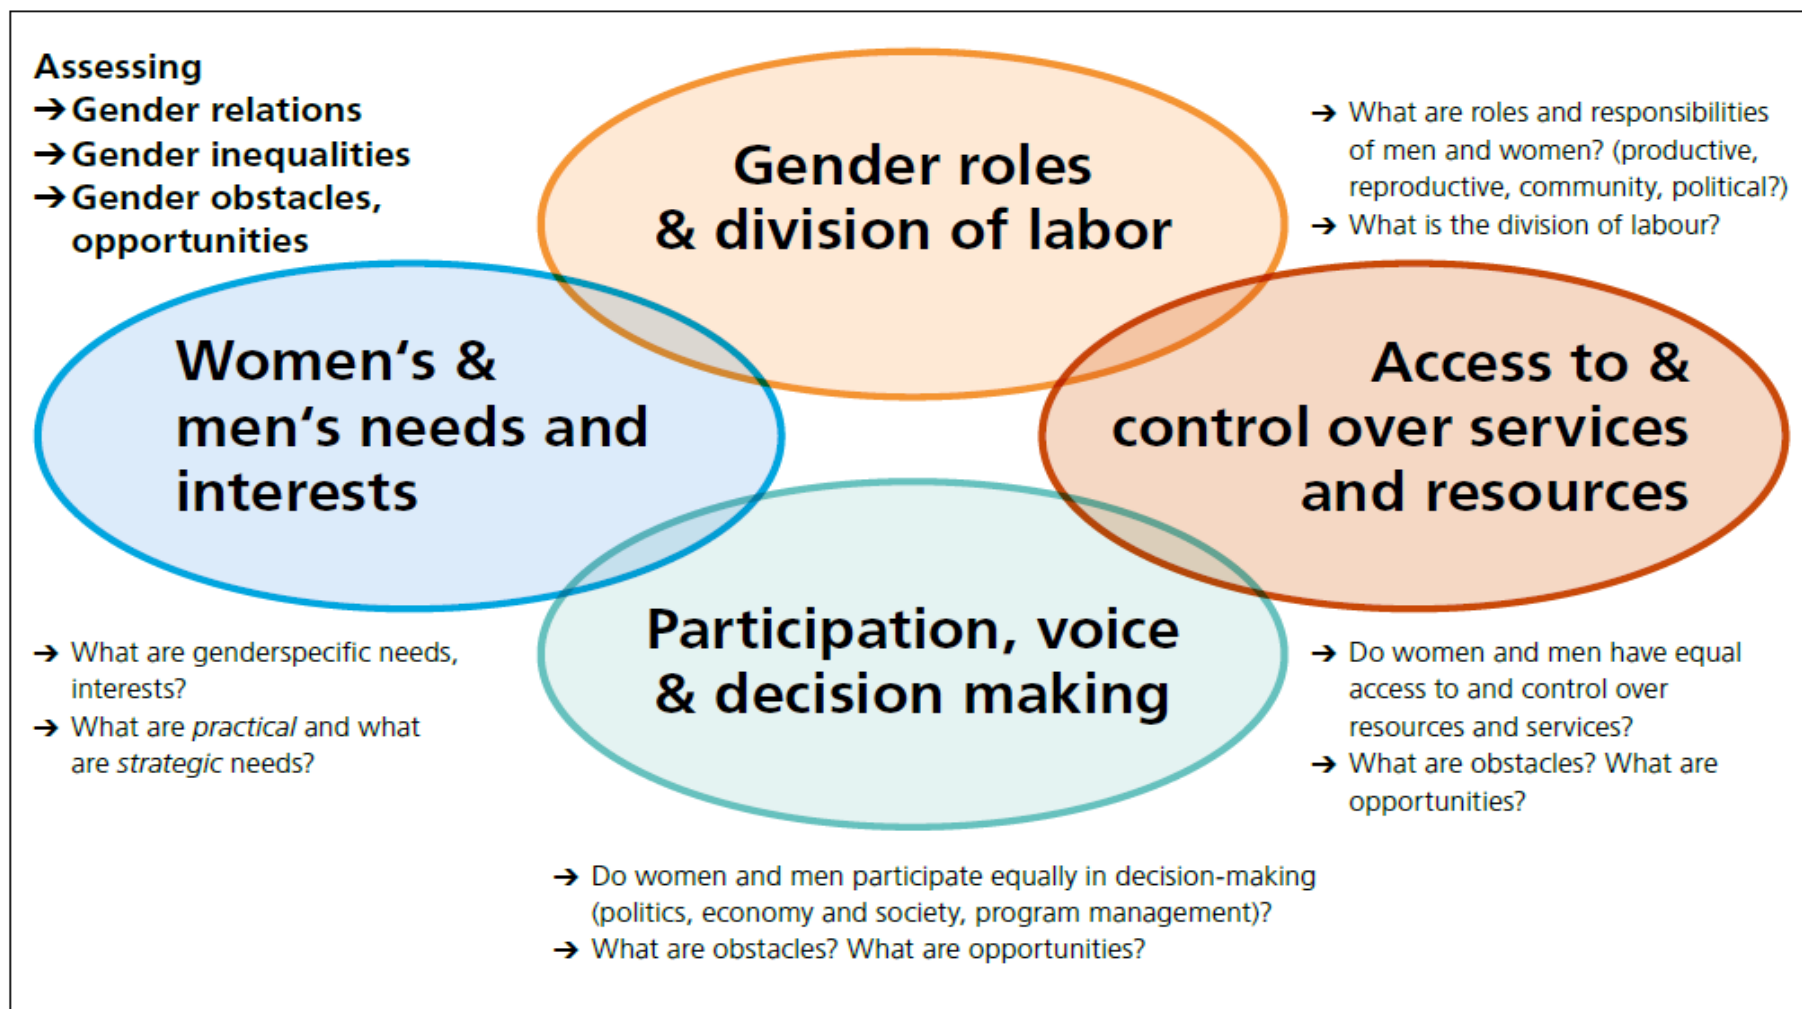

## Methodological challenges regarding data collection and analysis...

## Gender Analytical Framework: *Gender lens*

## Gender Analytical Framework: *Gender lens*

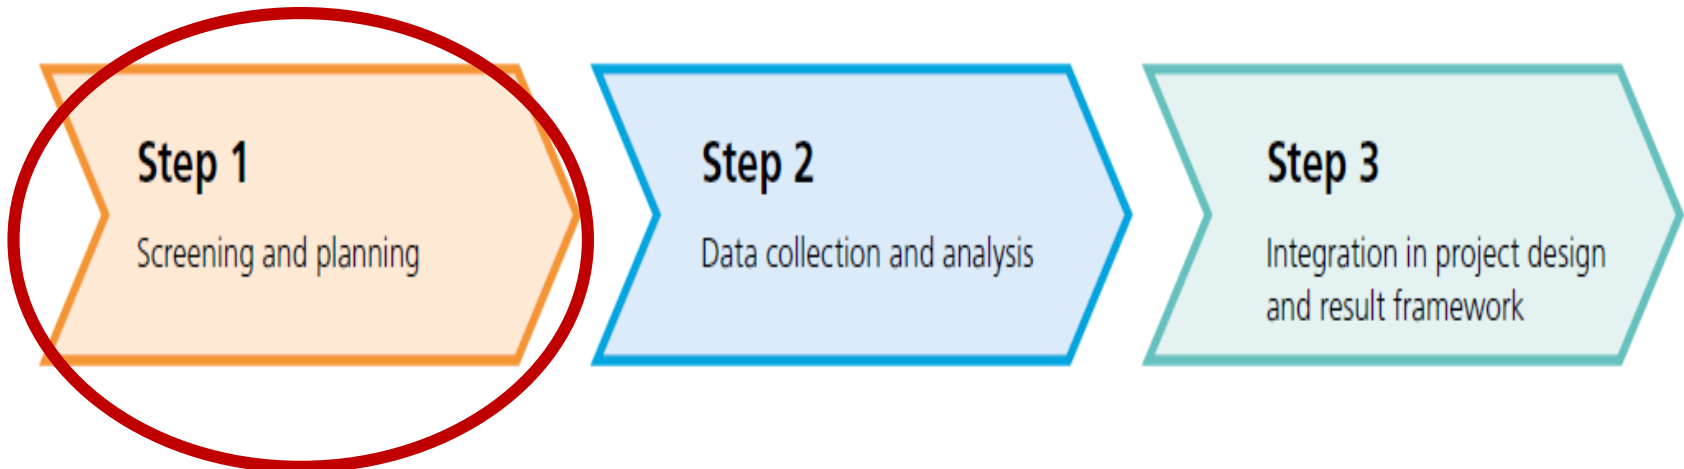

## Proposed Agenda

1. Gender Analysis in SDC
2. Video: GBA+ (City of Edmonton)
3. Challenges and Analytical Framework
4. Practical Application (Steps 1-3)
5. Recap and conclusion

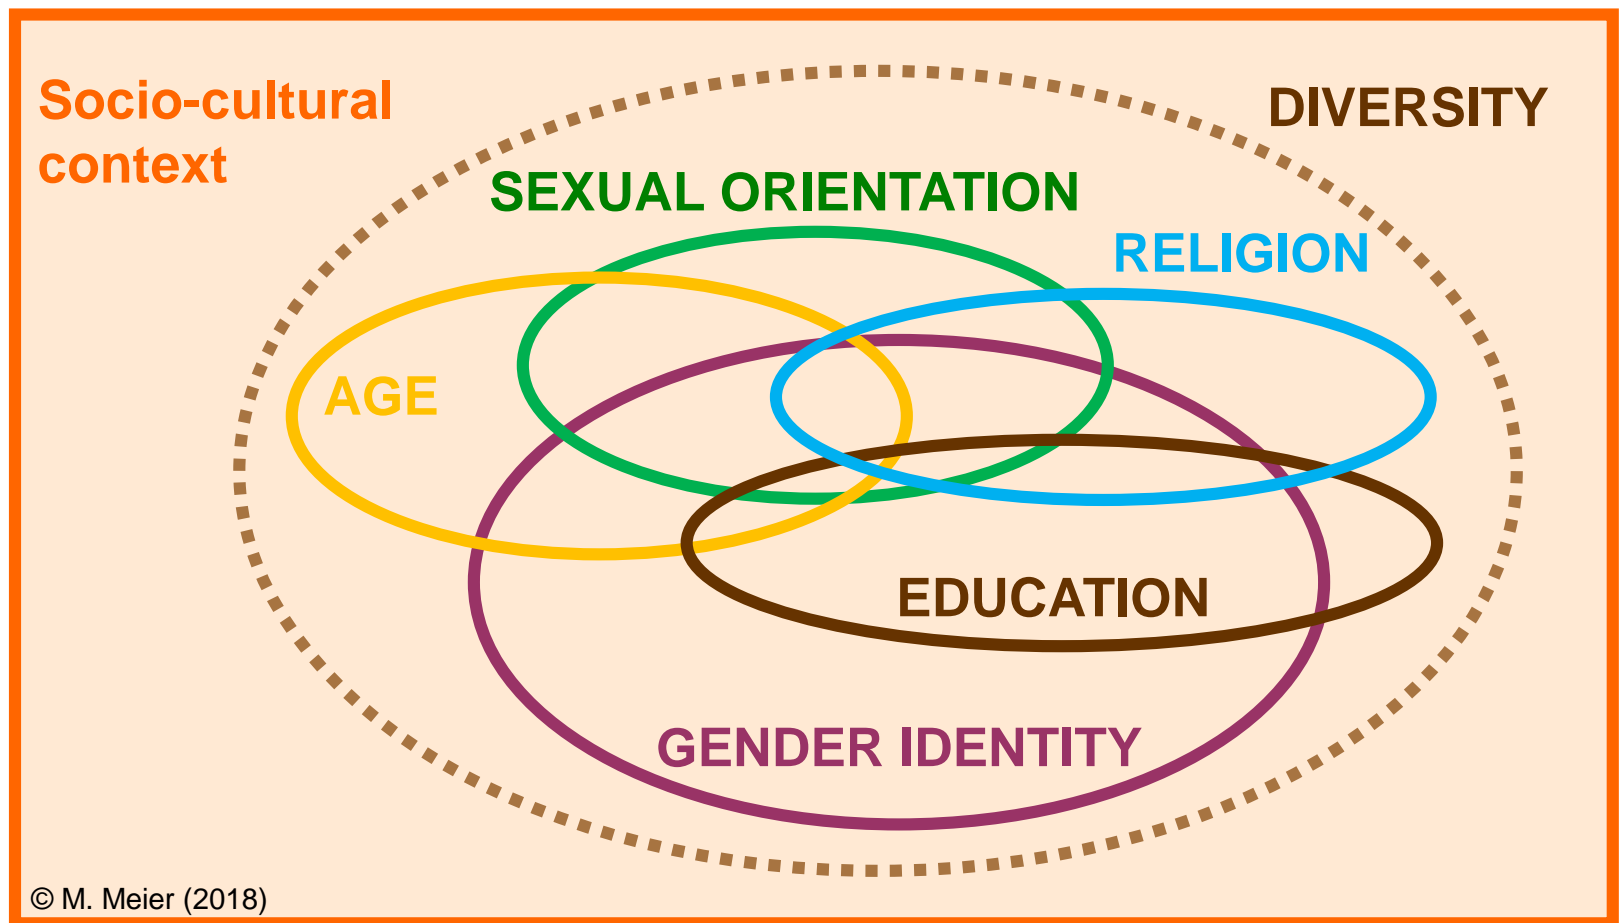

## Practical Application

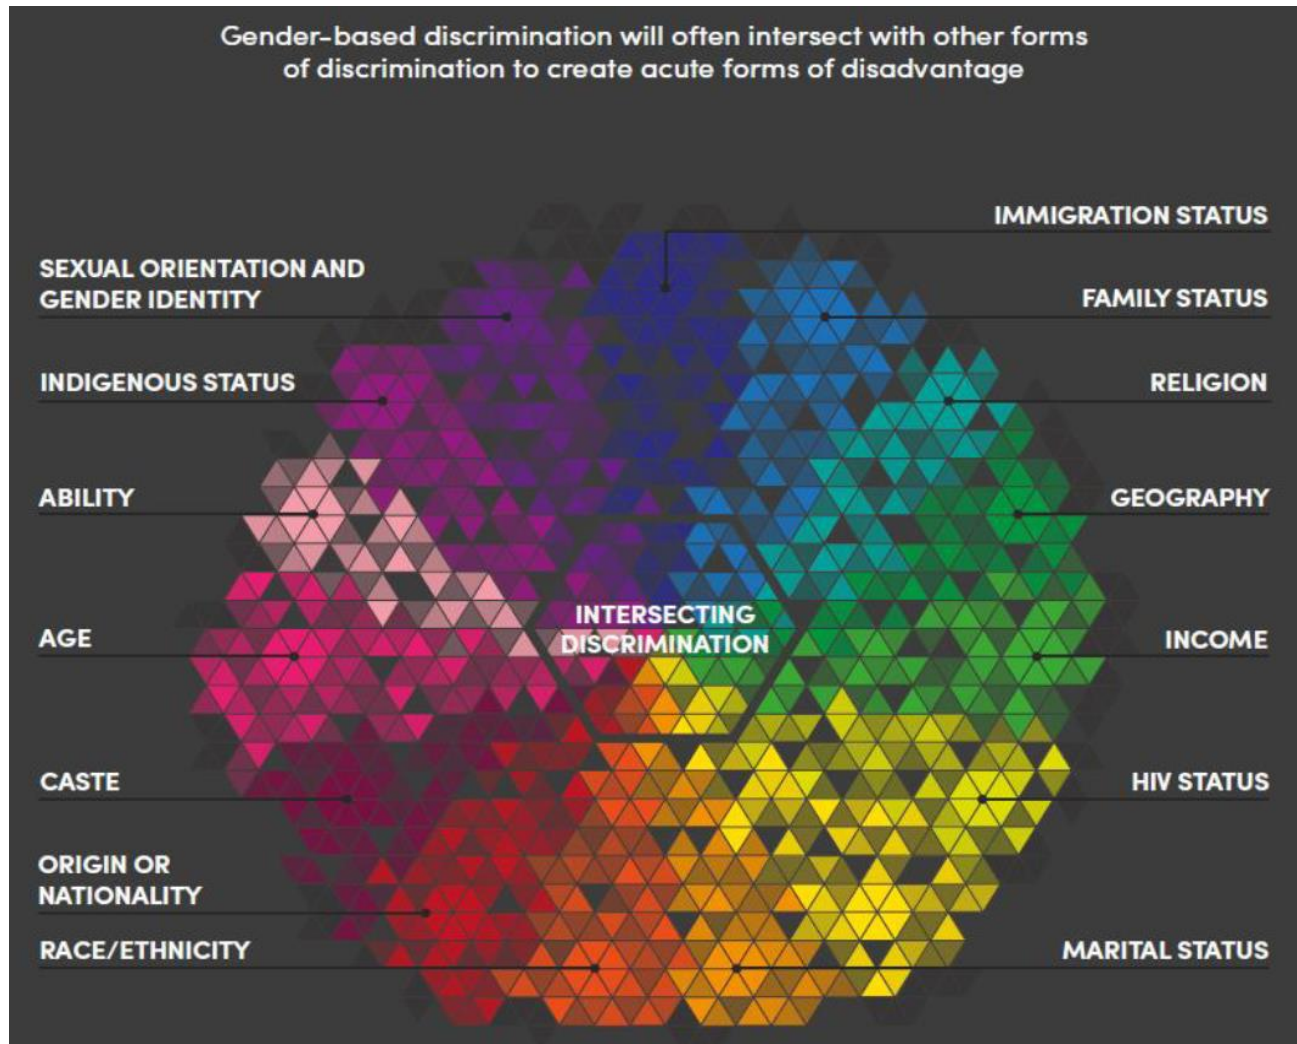

- **What do I need to know** to ensure that the planned intervention benefits both women and men and promotes gender equality?
- Who are the **target groups**? Which women and men (old, young, class, etc.), other **social groups, categories**? (Intersectionality)
- **Purpose**: Is the gender analysis for a project or a cooperation strategy?
- Has it a **regional** or a **thematic focus**?

## Diversity and intersectionality

'Being human' is complex

Source:  
UN Women (2018)

## Diversity and intersectionality

## Intersectional approach

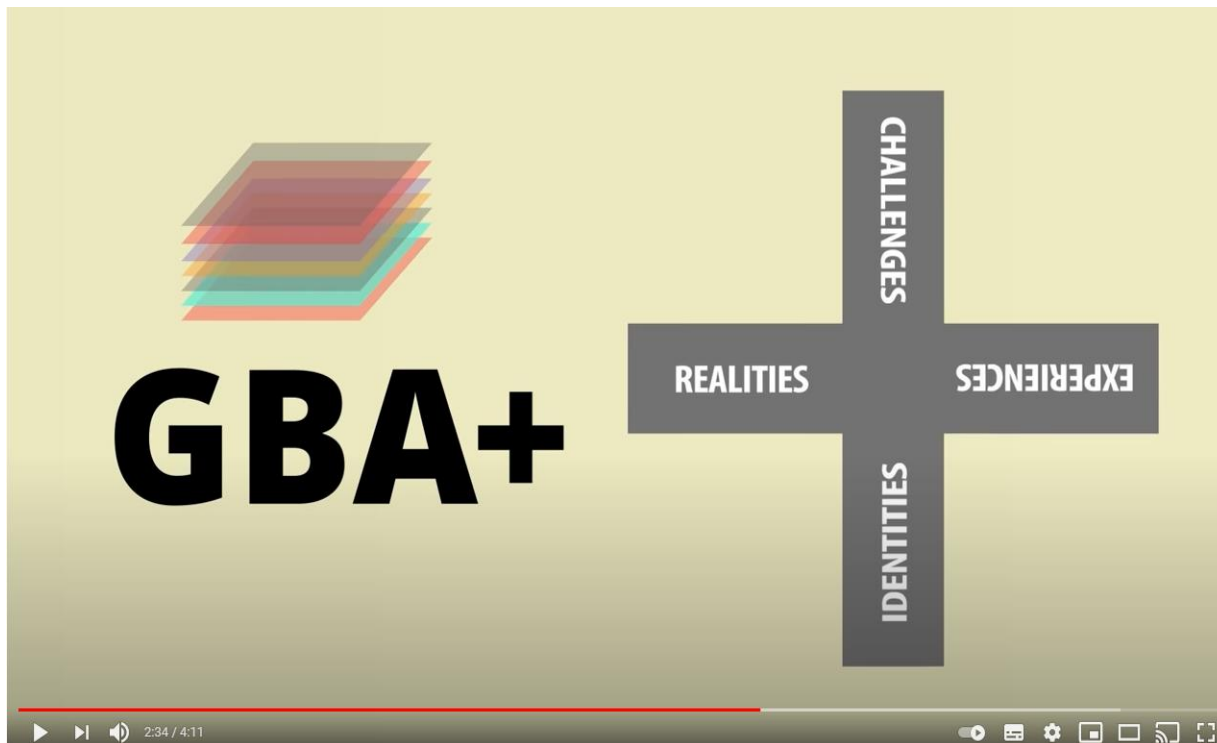

- various forms of social stratification do not exist separately, but they are **interwoven**.
- discrimination and/or favouritism may be **subtle, multi-layered, institutionalized, and systemic**.
- possible solutions must consider the social, political, economic, and legal environment that may contribute to discrimination and/or favouritism (**power structure** in family/community/society?).

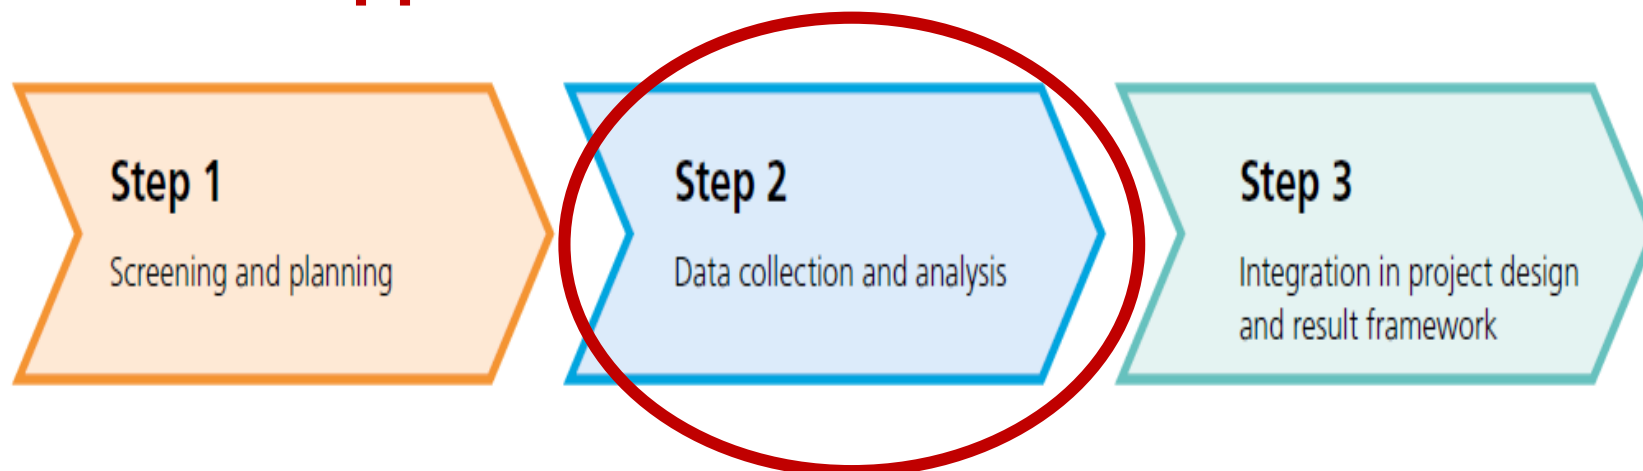

# Intersectional approach

## Gender-Based Analysis +

## Practical Application

- Do I need to **collect data** (primary data) or can I **rely on existing information** and statistics (secondary data)?
- Do I need **support** from an external, local expert?
- Can I **integrate gender questions in other assessments** conducted by the program, or do I need to conduct a **separate gender analysis**?
- What data and information are needed to **align with the SDC monitoring & reporting** system (Gender Reference Indicators, ARIs, etc.)?

## Data collection and analysis

## Importance of Sex-Disaggregated Data

- Disaggregating information by sex means that we **count males and females separately** when gathering information on development activities and benefits.
- Sex-disaggregated data helps assess whether an initiative is **successful** at targeting and benefiting women, men, girls, and boys as planned.
- Sex-disaggregated data is a **minimum standard** for planning, implementing, monitoring, and evaluating all types of development initiatives.
- If sex-disaggregated data is not consistently collected and analyzed, the reasons need to be **articulated and justified**.

**Important:** Information may be disaggregated according to **other key variables**, depending on the type of initiative, target group, and context (socio-economic status, age, ethnicity, religion, or location (rural or urban)).

## What makes an analysis / evaluation gender-responsive?

**Two essential elements:**

**What elements does a gender-responsive analysis/ evaluation examine (content/results)?**

Assessment of gender and power relationships, including structural and other causes.

**How is a gender-responsive analysis/evaluation being conducted (process/methods)?**

Process that is **inclusive, participatory** and respectful of all stakeholders.

## => Indicators: Gender ARI and TRI

### Example

GEN_TRI_4	Average <b>time</b> that women spend on unpaid domestic and care work (indicator similar to SDG 5.4.1)
-----------	--

## Gender Analytical Framework: Data collection tools

### Ex. Rapid Care Analysis

	Girl	Boy	Teenage girl	Teenage boy	Middle-aged woman	Middle-aged man	Elderly woman	Elderly man
Fetching water								
Cooking								
Collecting firewood								
Cleaning house/ compound								
Washing clothes								
Ironing clothes								
Washing utensils								
Care for children								
Care for dependent adults (elderly, sick)								
Food production for family								

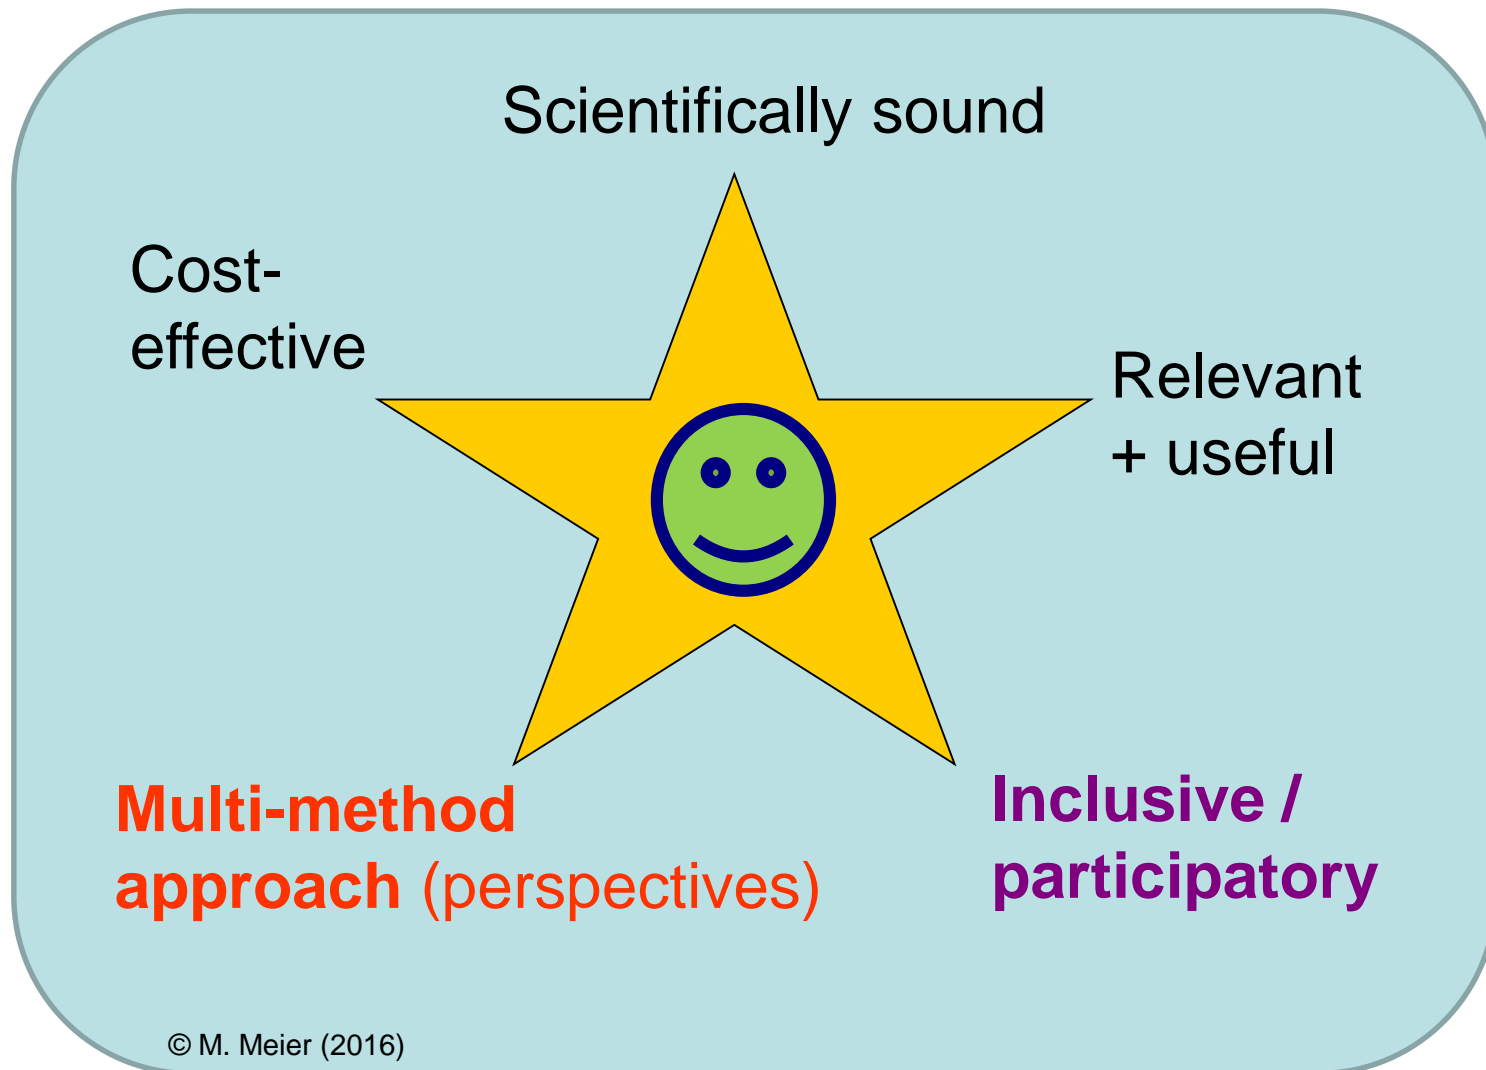

## Gender Analytical Framework: Data collection tools

### Ex. Community Mapping

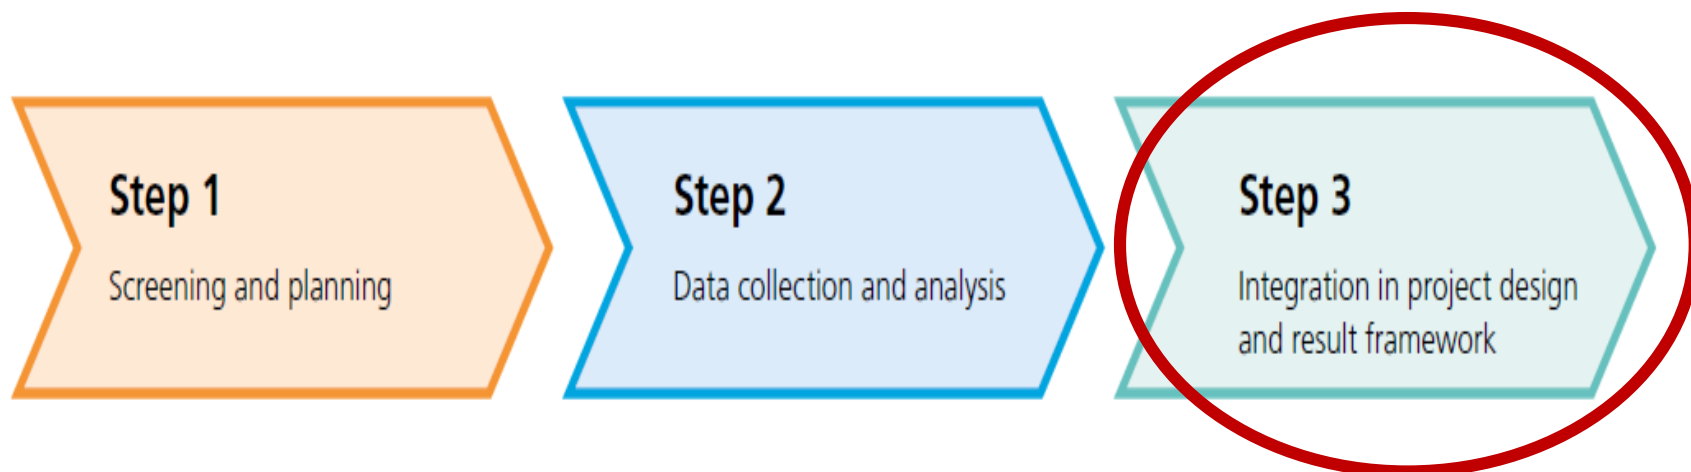

Photo: Meier (2009)

# 5-star Principles of „good“ Gender Analysis

## Practical Application

- What are **gender issues and inequalities identified** in the analysis?
- What are the **changes and objectives** I want to achieve through the project?  
What is my ***Theory of Change***?
- How do I integrate these objectives in the **project design and result framework** (output, outcome, impact level)?
- What are key elements of **reporting**? To whom in what way? => Day 4

## Proposed Agenda

1. Gender Analysis in SDC
2. Video: GBA+ (City of Edmonton)
3. Challenges and Analytical Framework
4. Practical Application
5. **Recap and conclusion**

# Questions C: Recap Gender Analysis

## 1. *What is it?*

What would you answer to a friend in simple words, if he or she asks the question:  
“What is a gender analysis all about?”

## 2. *When do we do it?*

Why is it important to choose the right moment for a gender analysis?

## 3. *Who does the analysis and why?*

Can you think of advantages and/or disadvantages of internal staff conducting the analysis?

Can you think of advantages and/or disadvantages of external experts conducting the analysis?

**How to Do a Gender Analysis**

 Schweizerische Eidgenossenschaft  
Confédération suisse  
Confederazione Svizzera  
Confederaziun svizra  
Swiss Agency for Development and Cooperation SDC

### I. Gender Analysis in SDC

The Swiss Agency for Development and Cooperation (SDC) is committed to promote gender equality in all areas of its work to ensure that women and men have the same rights to develop their potential and can use their resources in a meaningful way. The Agenda 2030 and the SDG 5 on Gender Equality and the Empowerment of Women and Girls guide our work. Promoting gender equality and sustainable development is only possible if we know where and why gender inequalities appear. Thus, the starting point of any intervention is a gender analysis to understand its implications for women and men, and the obstacles and opportunities to promote gender equality and women's rights. A gender analysis is a key tool to achieve meaningful gender outcomes and promote sustainable development.

This how-to note provides a practical guide for conducting a gender analysis. It aims at SDC operational staff and SDC partners in Switzerland and in partner countries.

Key questions to ask
1. What are gender inequalities and obstacles in your context?
2. What needs to change, what is the objective?
3. How can this objective be addressed in your intervention?
4. How can this objective be monitored and reported?

**What is it?**

Gender analysis is a **systematic analytical tool** used to identify, understand, and explain the different **roles, needs, and opportunities** of men and women and the **relations** between them. It identifies inequalities in terms of **power, resources and opportunities** between women and men that exist in households, communities, countries and different sectors. Moreover, it examines why these disparities exist, determines whether they are a potential impediment to achieving meaningful outcomes, and looks at how they can be addressed. A gender analysis makes a key contribution to the relevance, effectiveness and sustainability of development interventions.

SDC Gender How To Practical Guide Series | 1

## Important for Gender Analysis

- Include gender analysis in **terms of reference and budget**.
- Ensure responsible staff (researchers/analysts) have **necessary skills** (hybrid model).
- Inclusion of detailed **time-use data**.
- Analyse the gender dimension at **all stages of project cycle management (PCM)** to reduce gendered barriers and constraints at all levels (micro, meso and macro).
