

Workshop:

Political Empowerment

Gender-mainstreaming in public finance management to promote gender-responsive policies

Crosscutting question

What are key aspect, issues, learnings related to the sharing of responsibilities and (re-)distribution of unpaid care work?

How is addressing women's high share of unpaid care work an enabler/disabler for transformative change?

1. Reasons:

- Multiple task – caregivers
- Financial dependency (whilst this way come accross as embedded in cultural & societal norms)
 - lack of services that reinforce the role of women as caregivers

2. How to address:

- Participatory budgeting/prioritizing areas
- One stop shop for delivery of services
- Improved services/infrastructure

3. Address the issue through social norms (policy level: maternal leave/paternal leave)
