

Gender Equality and Social Inclusion GESI

Regional Workshop

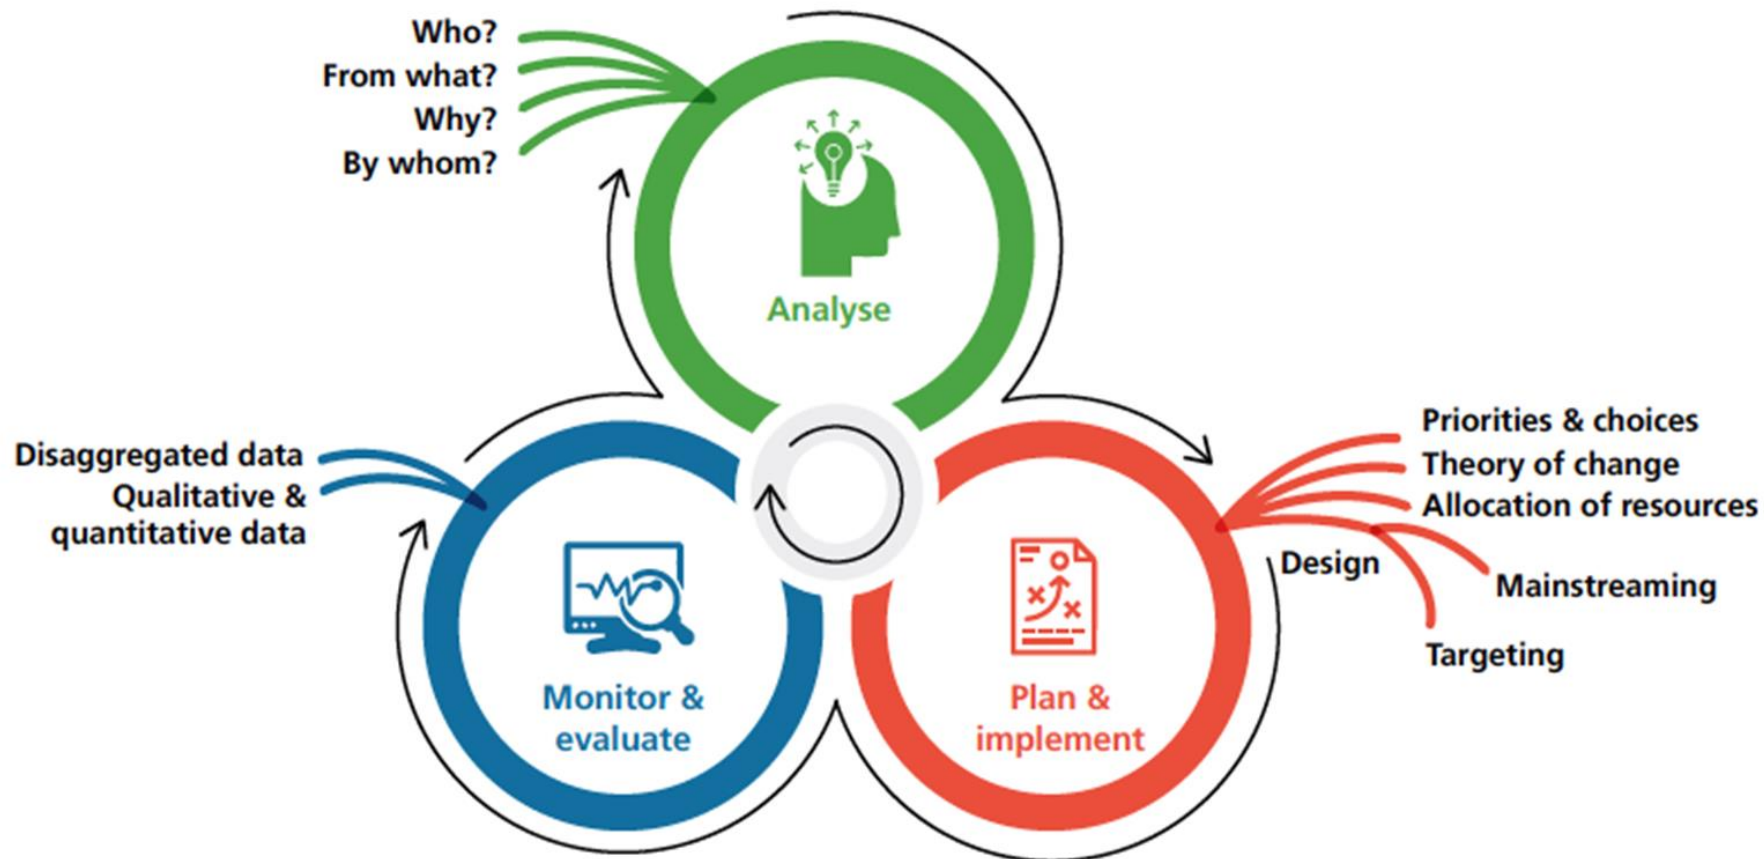

**LEAVE
NO ONE
BEHIND**

Drivers of Exclusion

Closing the gap

Systematic approach for transformative change

Example Factsheet Gender ARI on SGBV

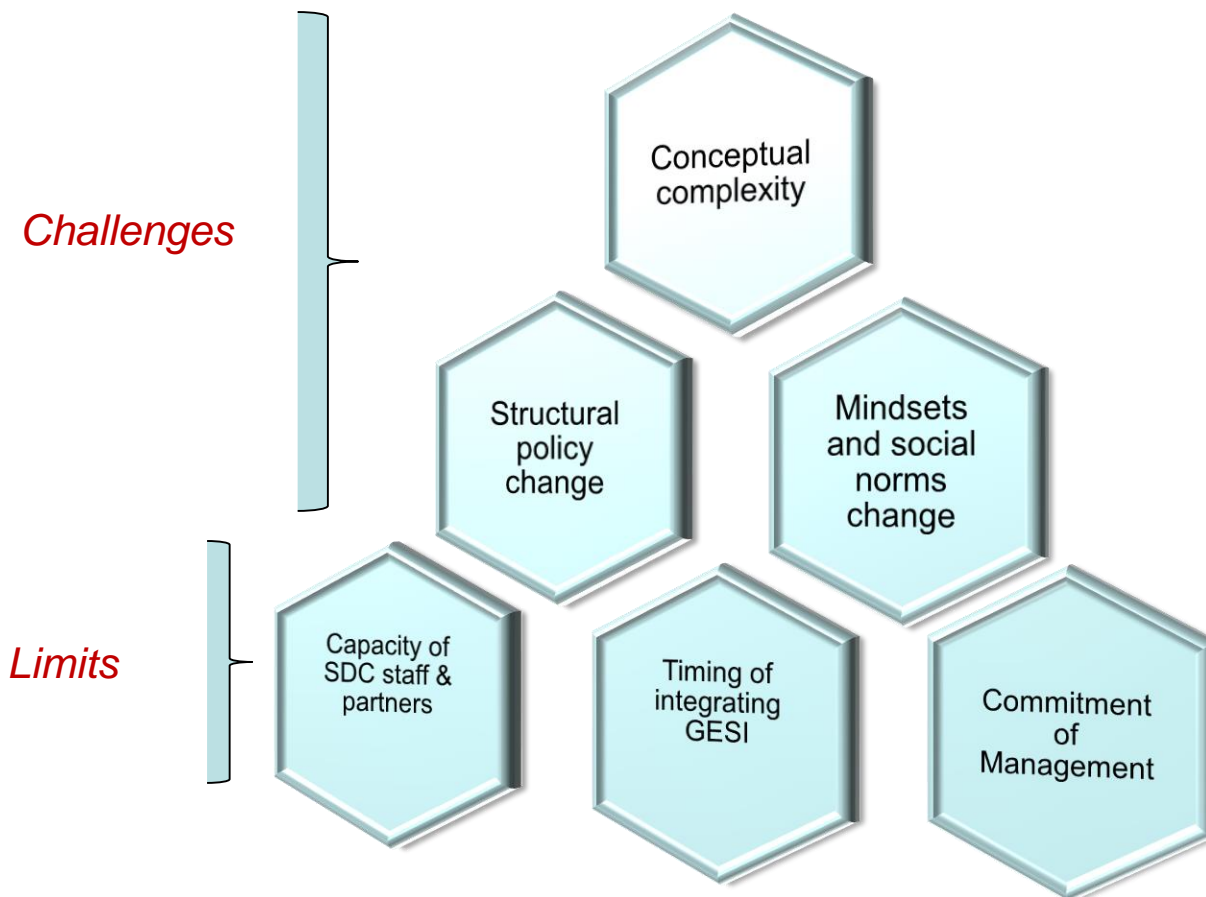

Disaggregation dimension (gender and age):

- Men and Women (aged above 18)
- Girls and Boys (aged under 18)

Rationale: *If* survivors of SGBV receive required support, **then** they can reintegrate into daily life and society and pursue their life in wellbeing, **because** they are able to recover from their suffering and traumata, regain their physical integrity and confidence and get justice and compensation for the assaults.

Possible messages of aggregation and synthesis: With the support of the SDC, in 20.., ww women, xx girls, yy men, zz boys receive..... They can regain.... Sanctioning perpetrators is also denouncing.....Finally, SDC may also contribute to....

What are challenges and limits when putting GESI into practice?

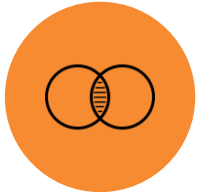

External shocks – Covid 19 pandemic

Main messages and conclusions

Inequality-blind interventions reproduce and deepen exclusion

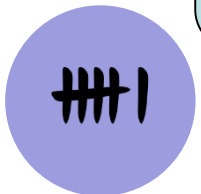

Gender and other inequalities 'intersects' reinforcing deprivation

Mainstreaming Social inclusion and gender are about the same things

A good gender analysis has to be exclusion-sensitive
A good social inclusion analysis has to be gender-sensitive

GESI monitoring is not only about counting women and excluded

Mainstreaming GESI is a process ... it can be initiated anytime ... but never ends!
