

## SGBV: recommendations

+

institutional strengthening of GBV service providers

GBV data collection

Engage in networks, emphasize the idea of shared responsibility, strengthen structures in place

Changing the mindset (sensitizing) of the public servants and service providers

Providing space for innovation/experimenting for trying new approaches, e.g. defining champions (positive champions) and adaptive leadership

Engaging non-traditional actors on SGBV (men, private sector, citizens' movements etc)

## Roma inclusion: recommendations

+

Coordinate with authorities with clear role and led by authorities

Alliance building between Roma organization and other engaged politically for the inclusion of disadvantaged

"Politicization" of poverty (blame the poor for the failures of the better offs) has been (and is still) common in the Covid-era, not only in countries hosting Roma minorities. The same discourse is valid for LMIC countries being blamed (with or without evidenced) or targeted for their "catastrophic conditions" (in Covid-19 response and risks of disease spread, collateral damages, etc.) by the global North (including through the international aid community), when the global North is performing worse on many levels. Numerous networks of "indignated" LMIC are forming (mostly spontaneously, but also with the support and facilitation of academic partnerships) to reestablish the narrative. Maybe organizations supporting Roma people could be linked up with this "movement".

Focus on identifying and eliminating systemic barriers that exclude Roma (and other vulnerable groups) from the labor market

Concrete targeted measures like free hot spot (access to internet) for Roma settlements

Ensure a good media coverage of counter examples helping to reframe Roma as spreader or danger in time of covid

Promote independent political economy analysis to better identify socially marginalized groups and move away from a "Roma only" agenda (or, alternative, to better describe the root causes of the social marginalization of Roma people and to identify viable entry points for solutions)

Multiply practice of having and using Roma community mediators

## Women Economic Empowerment: recommendations

+

What about digital technologies? How was the recommendation formulated?

Support UN Women and ILO to develop policy tools to ensure gender responsive COVID response - gender responsive employment programmes, engendering fiscal stimulus packages, costing the care economy

Join national level advocacy platforms with the purpose to influence business legislation and tax load

SC demonstrated great flexibility to changing context

close interaction with media in term of the better women involvement and participation.

Gender responsive budgeting at state level to ensure support

## Building back better: recommendations

+

Use the momentum to work on the social protection system to make it more targeted

Support civil society to provide adequate response

Digitalization and improving digital literacy is critical to ensure continuity, access to services and include the excluded.

Rule of Law as part of EU accession as an entry point

Reshuffle civil society support towards protection services

Support to Small businesses and income generating activities

Plan projects to increase social protection

Support the government for data collection, and development

for women and men in crisis situations.	of policy for urgent response
To use bottom up approach to mainstream gender and social inclusion issues, to assist the local level authorities in developing gender responsive and socially inclusive development programmes and action plans	Central and local governments need support to more effectively and adequately communicate to the population.
Support to self-employed, SMEs and individuals via assistance to develop online services	Engage in policy dialogue and also use the SDGs as a reference
	Support the dissemination of information on rights and services to excluded groups in times of crisis
	Continue with support of distribution of urgent aid
	Volunteerism proved to be vital in crisis, so it needs more attention and support.
	Make sure that the issue of social inclusion and voices of those excluded are heard by policy makers and picked up donors investing in recovery
	Better targeting of the measures for vulnerable people
