

Thematic Reference Indicators (TRIs)	
<b>CCE_TRI_2 Improved awareness and capacities on climate change</b>	
<b>Proportion of targeted stakeholders aware of and capable of better using information and tools to respond to climate change</b>	
Contribution to sub-objective of M21-24	<i>Sub-objective 3: Addressing climate change and its effects</i>
Contribution to 2030 Agenda: SDG target	<u>SDG target 13.3</u> : Improve education, awareness-raising and human and institutional capacity on climate change mitigation, adaptation, impact reduction and early warning
Definition (description, specification, qualification)	<p>Targeted stakeholders: stakeholders are people, groups, or organisations that are involved in your project/programme, whereas targeted stakeholders mean the people that you want to directly affect with the specific activity.</p> <p>Aware of: awareness is the ability to directly know and perceive, to feel, or to be cognisant of events. More broadly, it is the state of being conscious of something.</p> <p>Capable of responding: if a person is capable of doing something, they have the ability to do it.</p> <p>Tool here means something that helps you to do a particular activity, including, but not limited to, models, guidance sheets, checklists, etc.</p> <p>The proportion of stakeholders aware of and capable of better using information and tools has to be assessed by means of self-assessments by the targeted stakeholders.</p> <p><b>Note:</b></p> <p>Concerning climate change and environmental awareness-raising and knowledge-sharing in an educational setup, it is important to avoid double counting with EDU_TRI_5 'Education for sustainable development (climate change/health) &amp; for peace and human rights (basic life skills – lifelong learning)'.</p>
Measuring unit	Percentage
Disaggregation dimension (sex, age group, ethnicity or other identity criteria of LNOB)	<p>a) Number of persons aware and capable</p> <p>b) Total number of the population</p> <p>For the calculation of the value, the following formula will be applied by the RDM system: <math>a/b*100</math></p>
Data source	Programme and project reporting, specific enquires
Rationale	<p><u>Theory of change</u></p> <p><b>If</b> stakeholders are aware of and capable of responding, <b>then</b> they can seize opportunities for increasing climate resilience and fostering low carbon development pathways, <b>because</b> they have developed the capacity to implement more ambitious climate action.</p>
Possible messages of aggregation, synthesis and contribution	With the support of the SDC, in 202x xx% of the targeted stakeholders developed the capacity to adapt to adverse impacts and to reduce greenhouse gas emissions.
Thematic responsibility	CC&E Network (in coordination with Cluster Green)
